Ultimate in
Performance

Lubrall[®]
FRICTIONLESS TECHNOLOGY

**Industrial &
Automotive
Lubricants**

About Us

We are happy to introduce Lubrall as one of the fastest growing manufacturer and exporter of all types of industrial and automotive lubricants & speciality chemicals. Lubrall has a combined experience of over 15 years of technical excellence in the lubricant industry. The passion enthusiasm rooted in the basics makes Lubrall a success story. Lubrall is scripted fantastically in order to be an integral Lube Processing facility with prime focus on the following:

- Manufacturing and packaging of various lubricating oils.
- Manufacturing and packaging of greases.
- Manufacturing of specialty products for special & diversified applications.

Mission

Our Mission is to be a dynamic, profitable and consistent growth oriented company through market leading role, maximizing excellence in quality & service; to reward employees according to their ability & performance; to foster a network of Professionals ensuing unique contributions to the development of the industry; customer satisfaction and protection of the environment by producing emission friendly green products and to remain a good corporate citizen fulfilling its corporate social responsibilities in all respects.

Vision

To make the best company in world in the field of manufacture automotive and industrial lubricants and specialty chemicals. To become a leading contributor in INDIAN economy, emerging as leading player in Lubricant Industry among top ten lube and greases manufactures in the world. We strive to become a consistent & a major share holder in lubricant industry in Automotive and Industrial lubes, Base oils & Greases manufactures / sellers.

Global Collaboration

LUBRALL is an Indo-Korean organization engaged in the business of providing Complete Lubrication Solutions to Automotive and Engineering Industry. We have our Technical Collaboration with Korea company located in Busan (South Korea)

Corporate Value

We integrates honesty, integrity and business ethics in to all aspects of our business functioning

Customer Oriented

Continuous Improvement

Preferred Business Partner

High Level of Business Ethics

PRODUCTS :

Industrial Lubricants

Metal Working Fluids

Cutting oil, a metal working fluids formed by blending mineral oil , emulsifier, anti corrosive, anti foaming, anti oxidant, additives and trizine free biocides . it can be used on all types of ferrous and non ferrous metals and for all types of machining application

Neat Cutting & Metal Forming oil

Neat cutting oil are also known as straight oils they are highly refined Fluids based on mineral oil these are usually a mix of mineral oil and other additives these cutting oils can gives great surface finish Neat cutting oil are used in various machining operation like Grinding , milling, turning, drilling tapping, cutting etc. the oil Provide higher lubrication and reduce friction.

Industrial Cleaner & Degreasers

- The parts cleaning & degreasing products from Lubrall Chemicals are marketed under the name LUBRALL CLEAN
- A concept for degreasing and cleaning of all types of metal items from copper, brass, aluminum, steel and cast iron.
- The product's pH varies from slightly acid to neutral and slightly alkaline, as a result, degreasing of all types of metals is possible.
- It is mostly a combination of various substances like alkaline Builders, surfactant, sequestering agents etc.

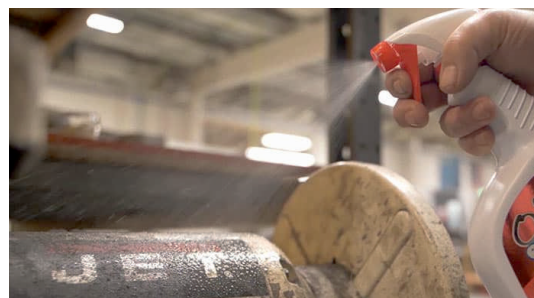

Rust Preventives

Lubrall manufactures rust preventive oils & solutions to protect metals from rust and corrosion. These solutions include water-based, solvent-based, and oil-based formulas for short-term or long-term protection. Products include corrosion inhibitors for in-process protection as well as for the protection of parts in storage and shipping. Our rust preventive oils, that contain those corrosion inhibitors, form a barrier film on the substrate surface. The inhibitor molecules adsorb on the surface, forming a film protecting the part from the attack of oxygen, water, and other chemically active substances

Industrial General Lubricants

- EDM Machine Oil
- Carrier Fluids For (Magnetic Particle Inspection) Machine
- Hydraulic Oils
- Slide Way Lubricants
- Gear Oils

Overseas Presence

We have an overseas presence which includes countries like Bangladesh, Myanmar, Thailand, Vietnam, Philippines, Ethiopia, South Africa, Uganda, Bulgaria.
